

Pavel Fryblík

Head of Data • Analytics • Modelling • Business Impact

Data and analytics leader with 15+ years of experience across banking, financial risk, BI, data science and technology. Strong background in mathematics, statistics, modelling and Python, combined with experience leading teams and turning complex data into business decisions. I build analytical systems that connect data, models and business strategy.

Work Experience

Head of BI / Data Science

Jul 2022

[UlovDomov.cz](#) • Brno

Jun 2026

- Built the data & BI function from scratch, creating a single source of truth for product, finance, sales and marketing.
- Led a team of 5 analysts and data engineers, aligning priorities with growth and profitability goals.
- Automated reporting and built sales forecasting across the acquisition funnel, replacing manual work and improving channel-level decision making.

Chief Growth Officer

Sep 2021

[MADFINGER Games, a.s.](#) • Brno

Jun 2022

- Defined and led the vision and mission for the Growth department, prioritizing team well-being and a data-driven culture.
- Managed departmental budget and project revenue forecasting.
- Aligned LiveOps, Data, ASO, Player Support and Community with strategic goals.
- Acted as Scrum Owner and facilitated agile practices.
- Mentored junior colleagues and provided training in database management, SQL and Python.

Associate Growth Manager & Lead Data Analyst

Apr 2021

[MADFINGER Games, a.s.](#) • Brno

Aug 2021

- Led initiatives to optimize data infrastructure and operational efficiency.
- Migrated reporting from Tableau to Streamlit.io using Python.
- Built a centralized "one point of truth" architecture with Docker Swarm and replicated PostgreSQL.
- Streamlined data flows with Apache Airflow.

Lead Data Analyst

Sep 2019

[MADFINGER Games, a.s.](#) • Brno

Jul 2021

- Led and mentored a team of data analysts.
- Designed dashboards in Tableau for management, finance, marketing and design.
- Built a reporting suite integrating PostgreSQL, DeltaDNA, Google BigQuery and APIs.
- Analyzed player behavior with scalable machine-learning models using Python/Dask.

Tutor – Data Analysis & Business Intelligence

Mar 2019

[ENGETO](#) • Brno

Present

- Teach data analysis and business intelligence, including statistical analysis, data visualization and machine learning.
- Focus on practical data-driven decision-making and extracting insights from complex datasets.
- Mentor learners and develop practical analytical skills.

Senior Business Intelligence Analyst

Feb 2016
Aug 2019

Edwards • Brno

- Developed global sales and order reporting systems using PostgreSQL, MS Access and Power BI.
- Collaborated on Python analytics algorithms, automating insights and generating personalized content based on usage metrics.
- Founded "The Vacuum University", an internal platform for technical skill development, and mentored talent.
- Presented on Robotics at an ABSL conference; awarded Employee of the Year (2016).

Business Intelligence Analyst

Jun 2015
Jan 2016

Edwards • Brno

- Developed SQL queries to optimize data retrieval and analysis.
- Established reporting standards and automated reporting workflows with MS Excel.

Junior Business Intelligence Analyst

Dec 2013
May 2015

Edwards • Brno

- Integrated robotics into the Financial Shared Center, streamlining ETL processes from SAP Business Warehouse.
- Improved global report visualization and standardized reporting practices.
- Conducted training sessions on SQL, relational databases and visualization.
- Awarded Employee of the Quarter (Q2 2014).

Junior Portfolio Manager / Junior Data Scientist

Jul 2011
Oct 2013

Raiffeisenbank CZ • Prague

- Prepared data in an Oracle database using PL/SQL for efficient data modelling.
- Managed credit-risk scorecard monitoring, validating parameters through statistical tests, logistic regression and SAS.
- Contributed to estimating and validating Loss Given Default (LGD) under Basel II.
- Played a key role in developing a new LGD model and supporting adoption of an Advanced Internal Ratings-Based (IRB) approach by the Czech National Bank.

Education

Master's Degree • Mathematics and Statistics in Economy

Sep 2009
Jun 2011

Masaryk University, Faculty of Economics and Administration

- Specialisation in mathematical statistics, econometrics and stochastic modelling for economic and financial applications.
- Junior member of a research project estimating and validating a Dynamic Stochastic General Equilibrium (DSGE) model for a small open economy (Czech Republic).
- Estimated model parameters using Markov Chain Monte Carlo (MCMC) methods and simulated macroeconomic dynamics (e.g. GDP, interest rates) to support economic and financial decision-making.

Bachelor's Degree • Mathematical Engineering

Sep 2004
Jun 2007

Brno University of Technology

- Broad foundation in mathematical analysis, linear algebra and numerical methods.
- Focus on applied probability, statistics and mathematical modelling relevant to engineering and economic systems.
- Developed strong analytical thinking and problem-solving skills for real-world technical applications.
